

QA ENGINEER

SOFTWARE TESTER

*"The last line of defence
before users hit a bug."*

WHAT THEY DO

The Guardian of Software Quality

Hunt Bugs

Find defects before they reach real users

Write Test Cases

Document exactly how every feature should behave

Automate Testing

Build scripts that test the app 24/7 automatically

Regression Testing

Re-verify fixes don't accidentally break other things

Guard User Experience

Ensure every user gets a flawless, error-free product

100%

Apps need testing

10x

Cheaper to catch bugs early

#1

Skill: attention to detail
